Jessie Davis Park Basketball Court Resurfacing Project

---

- Can you provide specifications of the basketball goals for the project?

**The Playground-with Acrylic Backboard**

Durable fixed height system with black powder coat finish and acrylic backboard. 66" extension arm for "play safe" area!

- Unit buries 48" into ground
- 6" square steel upright with angled extension arm
- Height can be adjusted after court resurfacing
- Flex goal, net, post and backboard edge padding included
- Backboard – 72"W x 42"H

- Item #: - LS-200

-

- What is the recommended underlying material of the slab? (gravel base, wire fabric, etc.)

**Place 4" Dense Graded Aggregate 100% modified proctor maximum dry density**

**Use 6x6 6/6 W.W.F. placed in the 1/3 slab thickness from top for the concrete reinforcing**

- Dirt Compression Testing – is it required/necessary? **If leaving soil in place, probe with a probe rod to make sure material is still good.**
- Will there be a site architect available from GMC for this project? **We can do site observations on an as-needed basis per GMC hourly rates. Anticipated scheduled meetings; Pre-Construction Meeting, periodic site observations, punch list/close-out meeting.**
